

Melbourne 2019

For over 50 years Burgoynes has been serving the insurance and legal sectors, industrial concerns and private clients in the UK and overseas, undertaking incident investigations. Developing on the success of our offices in Singapore, Hong Kong and Dubai, the Partners are excited to announce the opening of our first Australian office. The office will be opened in Melbourne in early 2019 by Mark Cousins, who is an experienced and practical Chartered Electrical Engineer and Certified Fire Investigator. Mark has been with Burgoynes since 2002 specialising in investigation of fires, explosions and electrical incidents. We are confident that his thorough scientific investigations, together with his enthusiasm for getting to the root of any challenge, will be warmly received by our clients in Australia.
